

Accelerating the SAP Clean Core journey with AI

Adopting a Clean Core approach for SAP Cloud ERP is no longer a technical preference – ***it's a business imperative***

SAP Clean Core

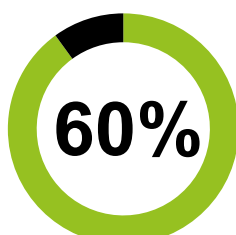

Yet the transition can be burdensome, navigating **custom code**, **poor data quality**, and **unoptimized processes**

Clean Core SAP transformations are often **complex, time-consuming, and costly**. Engaging GSIs to help can require a **multi-million dollar investment** to cleanup outdated code and processes.

of traditional ERP systems include customizations (often deep, code-level) to support unique business processes¹

of companies report that these customizations make upgrades difficult and expensive¹

Organizations can spend months (*if not years*) mapping the transition from where they are to a Clean Core solution

Lemongrass Clean Core AI

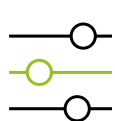

Purpose-built to accelerate discovery and handle the complexity inherent to deeply customized SAP environments

Automates code analysis

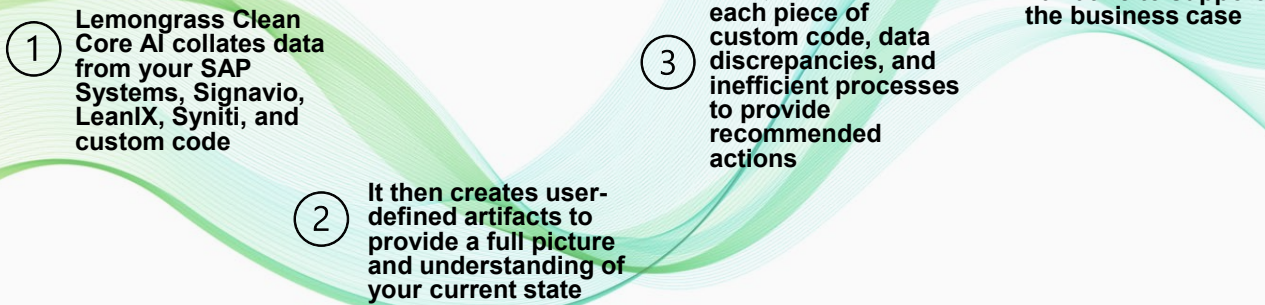

Suggests intelligent refactoring options

Optimizes assets with minimal disruption

How does it work?

How does it help?

-  Reduces reliance on expensive, manual code reviews
-  Ensures a faster, smarter Clean Core transformation
-  Frees up valuable resources for strategic innovation

Lemongrass Clean Core AI dramatically accelerates discovery from months or years to **just weeks**

Ready to jumpstart your transition to Clean Core?
