

Boomi for SAP: Connecting Experiences

Connect your third-party systems and data to SAP with an agnostic, enterprise-class, cloud-based digital platform

SAP ECC and SAP S/4HANA ERPs are often considered “the backbone of the business.” But to extend that value across the entire enterprise, a modern agnostic digital platform solution is needed. With the low-code Boomi Platform, SAP customers can quickly, easily, and affordably connect to any third-party system or application and optimize value streams.

START TRANSFORMING YOUR DATA ECOSYSTEM FOR YOUR S/4HANA JOURNEY

SAP helps enterprises manage their day-to-day processes and core capabilities, connecting functions from multiple lines of business and industry solutions to help businesses with digital transformation. But to extend that productivity throughout the enterprise, integration with other applications is a must.

Boomi provides SAP customers with all the advantages of an enterprise-class, cloud-native digital platform. With the low-code Boomi AtomSphere Platform, organizations can easily build integrations in a fraction of the time needed by conventional integration products and appliances, at a fraction of the cost.

KEY BENEFITS

Customer Engagement to Customer Experience

Connect the dots between SAP and third-party applications to provide a seamless customer experience.

Enabling Citizen Data for AI

Embed pre-built integrations into your applications with Boomi. Business users can configure their own integrations and get the data that they need using a wizard-driven approach.

Order-to-Cash

Ensure the connectivity required for smooth order-to-cash transaction processing and management with Boomi’s 1,500+ out-of-the box integrations and vast library of crowdsourced knowledge.

Supply Chain Planning and Operations

Get up-to-date data in real time by integrating third-party applications with SAP supply chain solutions, and easily automate critical tasks with Boomi Flow.

B2B/EDI Management

Integrate SAP with Boomi B2B/EDI Management to support EDI interoperability standards including ASC X12, HL7, RosettaNet, Tradacoms, and UN/EDIFACT, plus API standards.

Production Planning and Maintenance

Streamline the integration of IoT data into SAP systems to improve business operations and drive digitization.

Onboarding Customers, Partners, and Employees

Quickly automate manual workflows and exchange data between SAP and third-party applications, for seamless onboarding.

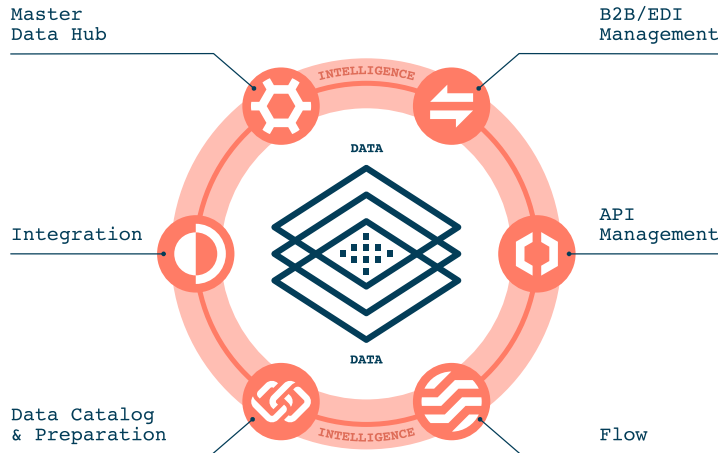

Mergers, Acquisitions, and Divestitures

Consolidate SAP data to other ERP systems (or vice versa) for assured business continuity.

Modernization: Third-party Systems to SAP S/4HANA

Go beyond SAP ECC-to-SAP S/4HANA migration. Integrate data between SAP and any third-party system or application with the Boomi Platform.

BRING ALL YOUR SYSTEMS, TECHNOLOGIES, AND DATA TOGETHER WITH BOOMI

Boomi provides SAP customers with all the advantages of an enterprise-class, cloud-native digital platform.

Integrate diverse applications, data, events, devices, and people, both internally and outside your organization.

Trusted by more than 18,000 organizations, the Boomi Platform provides a market-leading set of integration and data management capabilities including:

- **Boomi Integration:** Boomi scales to meet high-volume needs in real-time, mobile, batch (ETL), and EDI environments.
- **Boomi B2B/EDI Management:** Rapidly onboard suppliers and other partners, and monitor all interactions through a centralized portal
- **Boomi API Management:** Centrally create, publish, and manage APIs and web services, extending access across a growing number of applications.
- **Boomi Flow:** Quickly build automated workflows that streamline administrative and citizen-facing processes.
- **Boomi Master Data Hub:** Synchronize and ensure data quality, providing trusted information across all systems.

WHY BOOMI?

Connect and Transform SAP Data, Systems, and Processes

- Artificial Intelligence (AI) Systems
- Internet of Things (IoT)
- Customer Engagement and Experience
- Sales Planning and Orders
- Supply Chain Planning and Operations
- Supplier, Partners, Vendors, Customers
- Marketplaces, Distributors, Retail
- Procurement
- Production, Shop Floor
- Logistics
- Human Experience
- Travel and Expenses

Industries

- Energy and Natural Resources
- Consumer Industries
- Discrete Industries
- Service Industries
- Public Services
- Finance Services

Extended Ecosystem

- Proven connectivity to 1,500+ endpoints, including 200+ applications
- Drag-and-drop integration development, no coding required
- Any-to-any integration across cloud and on-premises systems
- Intuitive, centralized integration management
- Community access to connectors, widgets and process maps
- Extensive crowd-sourced knowledge and guidance
