

Keep ERP at the heart of your enterprise with an SAP S/4HANA private cloud

Realize your SAP S/4HANA cloud strategy and fully control your solution with HPE

See how **SAP S/4HANA® private cloud powered by HPE GreenLake** provides the expertise, customization, and cloud advantages you need to transform critical ERP environments.

Cloud + control

Get the advantages of cloud and the control of an on-premises solution with an SAP S/4HANA private cloud powered by HPE GreenLake.

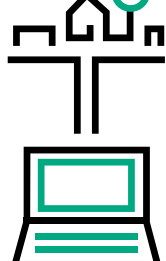

Automated and managed solution
HPE manages your solution at the level you choose. Reduce the need for scarce management skills.

Predictable monthly costs
Pricing is not dependent on promotions, reserved capacity, or length of commitment.

Cloud billing

Consume and operate infrastructure as a service.

Always-on infrastructure
Depend on SLAs that guarantee 99.99% uptime.

Scale elastically

Monitor and predict growth and easily switch buffer capacity on or off, with HPE GreenLake.

On-premises or co-located

Control your data, infrastructure, and applications.

No need to manage or own a data center.

Work with an HPE co-location partner or choose your own.

Elevated support

Complete care provides a single point of contact for the infrastructure environment.

HPE GreenLake platform spanning edge to cloud

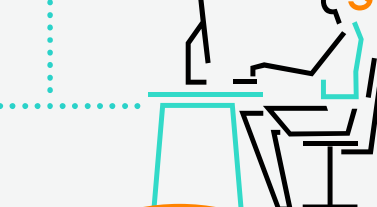

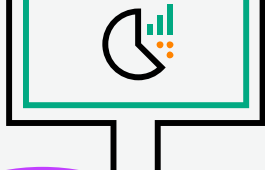

Power of choice

Evaluate a range of SAP S/4HANA strategies with HPE

<p>SAP HANA + ERP Central Component</p> <p>Buy SAP software licenses your way. Deploy and run with your choice of partners.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  <p>SAP S/4HANA private cloud powered by HPE GreenLake</p> <p>Managed, SAP-certified infrastructure with HPE GreenLake.</p> </div> <div style="text-align: center;">  <p>Traditional data center</p> <p>SAP-certified HPE hardware.</p> </div> </div>	<p>RISE with SAP®: S/4HANA cloud from SAP</p> <p>A bundle of ERP software licenses and services for migrating to SAP S/4HANA in the cloud.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">  <p>Private edition, customer data center option</p> <p>Managed, SAP-certified infrastructure with HPE GreenLake.</p> </div> <div style="text-align: center;">  <p>Public or private edition with hyperscalers</p> <p>Deploy with SAP cloud or hyperscaler.</p> </div> </div>

Tailor solution outcomes

SAP S/4HANA private cloud powered by HPE GreenLake

Consumption-based infrastructure

Predictable monthly costs. Fully control your infrastructure.

Infrastructure as a service

Managed infrastructure including backup and recovery services.

Platform as a service

Managed SAP Basis workloads including OS, database management, and application server.

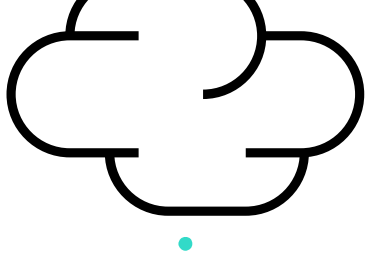

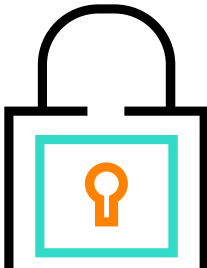

Customize your SAP S/4HANA environment

HPE believes each of our customers is unique and every SAP landscape is unique

- **Right-size your infrastructure** — with industry-leading platforms like HPE Superdome Flex 280, HPE Compute Scale-up Server 3200, and HPE Alletra Storage.
- **Migrate your existing environment** — including customizations. This isn't always possible in the public cloud.
- **Choose your system integrator** — or managed service partner, with HPE GreenLake.

Expertise

Migrate to and run SAP S/4HANA with an expert partner.

<p>Certified SAP Global Partner</p> <p>Cloud and infrastructure operations. Hosting operations. SAP HANA operations.</p>	<p>Scalability leadership</p> <p>HPE offers SAP-certified solutions with up to 32 TB memory and 16 sockets.¹</p>
<p>Performance leadership</p> <p>#1 SAP BW Edition for SAP HANA Standard Application Benchmark (Version 3) for 8, 16, and 32 sockets.²</p>	<p>30+ years</p> <p>of industry-leading, co-innovation partnership with SAP.</p>
<p>Private and hybrid cloud leadership</p> <p>HPE GreenLake is the best-known edge-to-cloud platform according to an IDC survey,³ with over 1,600 global implementations.</p>	<p>100 TB</p> <p>HPE's own IT runs SAP at scale with our co-location partner.</p>
	<p>40,000+</p> <p>HPE servers have been deployed for SAP HANA® worldwide.</p>

Determine needs and pricing in days, not weeks

<p>HPE discovery meeting</p> <p>Match your needs with the best-fit solution and deployment type.</p>	<p>Turnkey solution proposal</p> <p>Receive a statement of work in a matter of days.</p>	<p>Transparent cloud costs</p> <p>Monthly costs are predictable and include everything you need in production.</p>
