Agenda

- Market Environment
- Treasury and WCM Process Overview
- Cash Management
- Payments and Bank Communications
- Treasury and Risk Management
- Working Capital Management and Taulia
- Wrap Up

Trends and Market Dynamics

Market Dynamics

Unpredictable economic conditions, such as inflation rates, exchange rates, and geopolitical events...

Fluctuating interest rates impacting borrowing costs and investment returns...

Cybersecurity and financial risks...

Evolving regulatory landscape...

Rapid technological advancements and digitalization that transform financial landscapes...

Cash forecasting becomes critical as companies minimize cash balances, investing as much as possible without dipping into debt.

Bank resiliency and counterparty risk should be thoughtfully managed, selecting and evaluating the right partners while reducing dependencies.

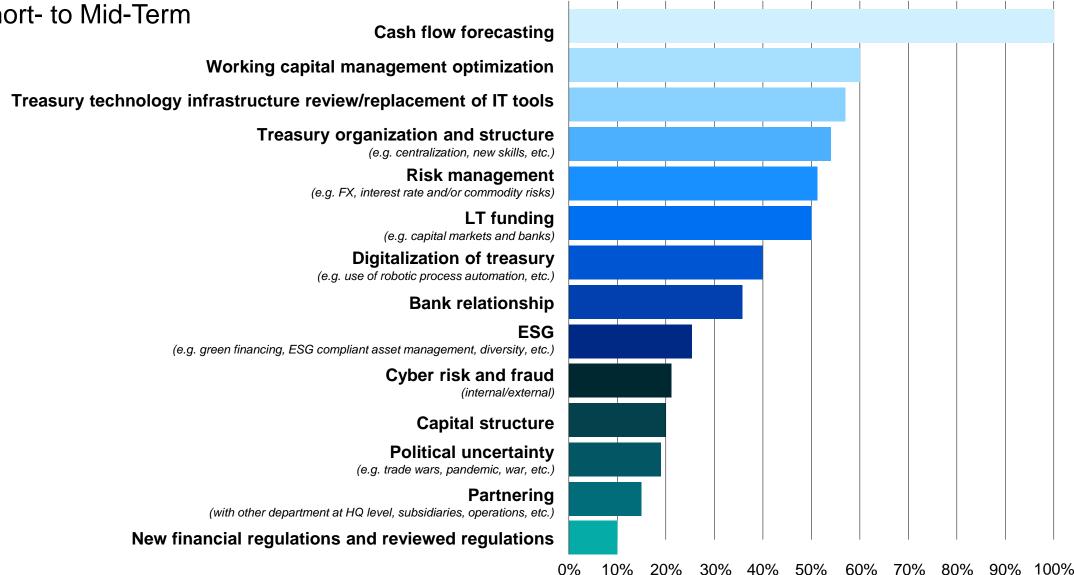

Sustainability duties should be fulfilled, for example, like ESG reporting, carbon offsetting, and the related Transactional Carbon Accounting.

Moving to Cloud technologies is paramount to keep pace and benefit of innovations like artificial intelligence.

Treasurers' Priorities

in the Short- to Mid-Term

Treasurers' major priorities over the next 12 to 24 months*

Required Capabilities for the Modern Treasury

1 Cash and Liquidity Management

Optimize the availability and utilization of funds, ensure sufficient cash flow for operational needs while minimizing financial risks.

Working Capital
Management

Effectively manage the short-term assets and liabilities of a business to ensure smooth operations, meet financial obligations, and maximize profitability.

2 Debt, Investment and Risk Management

Optimize the capital structure, make informed investment decisions, and mitigate financial risks to maximize returns and safeguard the financial stability of an organization.

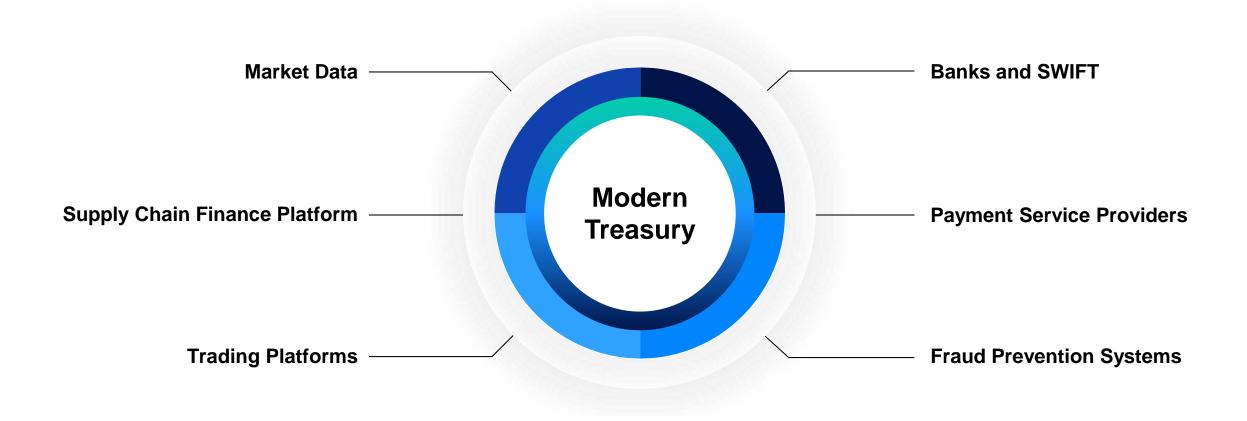

3 Payments and Bank Communication

Facilitate secure and efficient financial transactions, enable seamless transfer of funds between parties, and provide timely and accurate information exchange with banks for effective financial management.

5

The Importance of the Ecosystem and APIs

Public

6

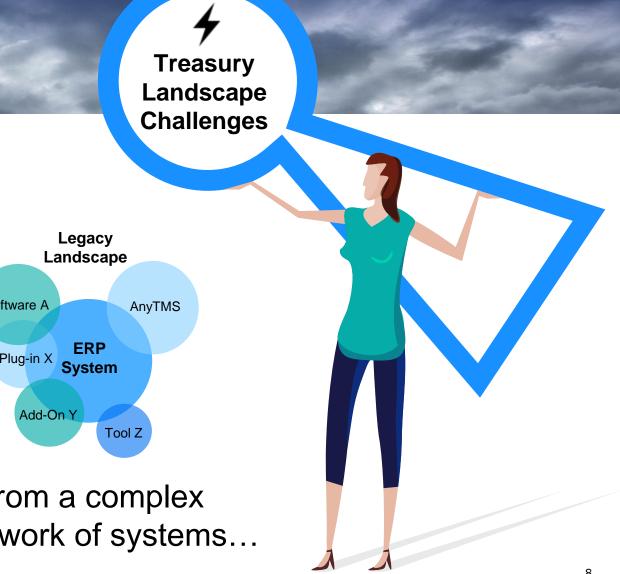

Challenges with Existing Treasury Solutions

Often lacks flexibility, scalability, and automation

- Lack of automation and controls due to different processes and data models across multiple applications and systems.
- Lack of visibility on different FX, interest rates, and commodity exposures.
- Untimely and incomplete cash relevant information.
- **Multiple systems** housing bank accounts in a large number of banks.
- **Inefficiencies** in the Order-to-Cash process in a volatile, uncertain and hypercompetitive world.

SAP S/4HANA Cloud for Treasury and Risk Management

Process and Solution Overview

Analyze FX, IR + Classify + Import Exposure Determine Hedge Requirement Trigger Requests Trade Treasury Deal Surplus Manage Debt Payment

Solution Capabilities

Corresponding Solutions

SAP S/4HANA Cloud for Treasury and Risk Management

Solution Capabilities

On-the-fly analysis with extensive overviews and deep drill-downs.

Real-time views of positions, risks, and valuation.

Smart trading with standard-delivered automation and trading portals.

Built-in market data integration.

End-to-end deal lifecycle management for debt, investment, and risk management transactions.

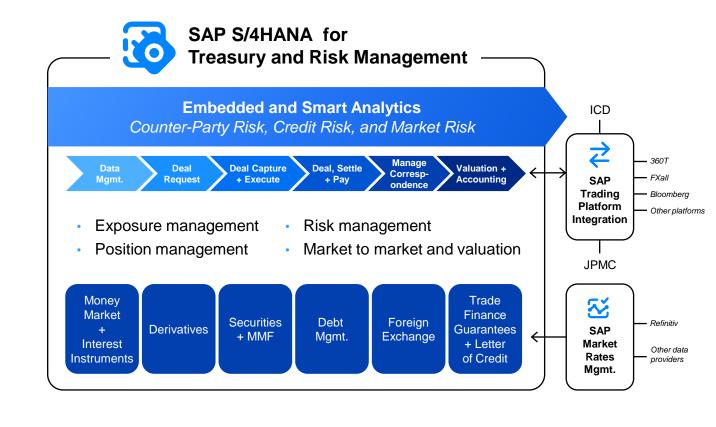

Large number of pre-set financial products.

Hedge accounting for FX risk with support for IFRS and GAAP requirements.

Business integrity management through GRC.

SAP Multi-Bank Connectivity

Different options to connect corporate customers and banks:

SWIFT

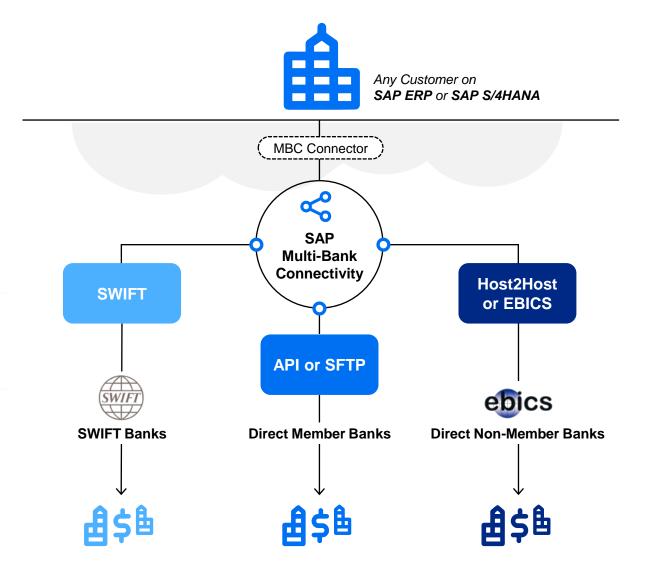

The solution is **fully SWIFT certified** as SWIFT L2BA provider and offers the possibility to connect to the extensive list of SWIFT banks throughout the world.

API or SFTP

Direct Member Banks are connected via a standardized connection using bank APIs or protocols like SFTP.

Host2Host or EBICS

In an instance where a corporate customer requires to have a direct connection to a bank that does not have a contractual agreement with MBC, SAP establishes a **direct connection** between corporate customer and the non-member bank.

25

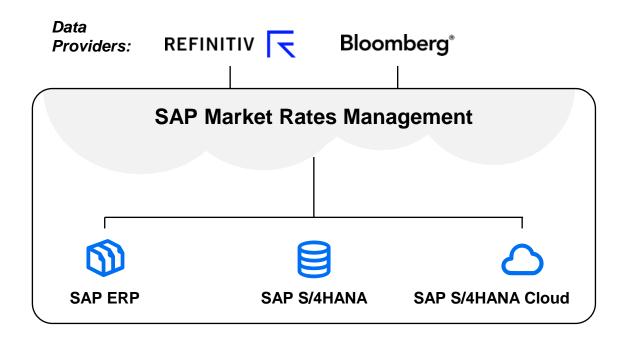

SAP Market Rates Management and SAP Trading Platform Integration

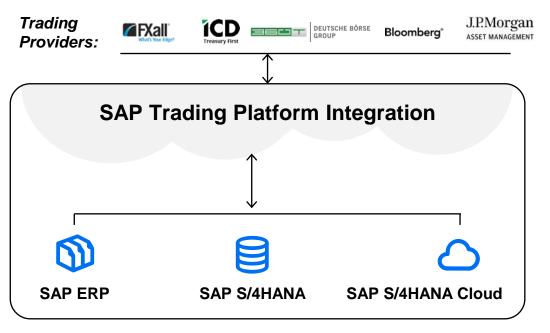

Fully Automated Market Data Management

- SAP Market Rates Management (Refinitiv data option)
- SAP Market Rates Management (Bring your own rates data option)

Smart Trading using Trading Platform Integration

- Outbound Service (Manage trade request)
- Inbound Services (Manage trade)

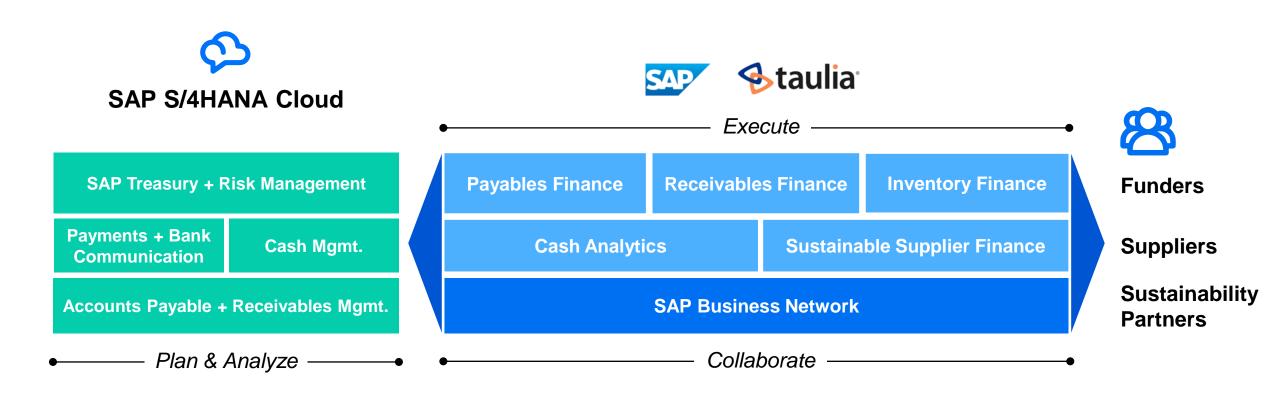

Working Capital Management with SAP and SAP Taulia

Solution Suite Spanning Multiple Stakeholders

INTERNAL – SAP and Partners Only

SAP Taulia Working Capital Management Solutions

Dynamic Discounting

Offer suppliers early payment and earn a risk-free return for your business.

Supply Chain Finance

Offer your suppliers vital cash flow freedom using third-party funded Reverse Factoring.

Inventory Finance

This provides supply chain assurance, mitigating against long lead times, stock outages, and lost sales.

Receivables Finance

Receive early payment on invoices due from customers. Optimise working capital, reduce DSO.

Analytics & Al

An intelligent analytics suite that guides you in how to improve working capital performance.

Multi-Funder Platform

Access funding from your relationship banks and from our global network to get the cash you need.

End-2-End

SAP Treasury solutions enable detailed planning, SAP Taulia WCM enables program setup and execution, while SAP Business Network enables collaboration with funders and suppliers.

ESG

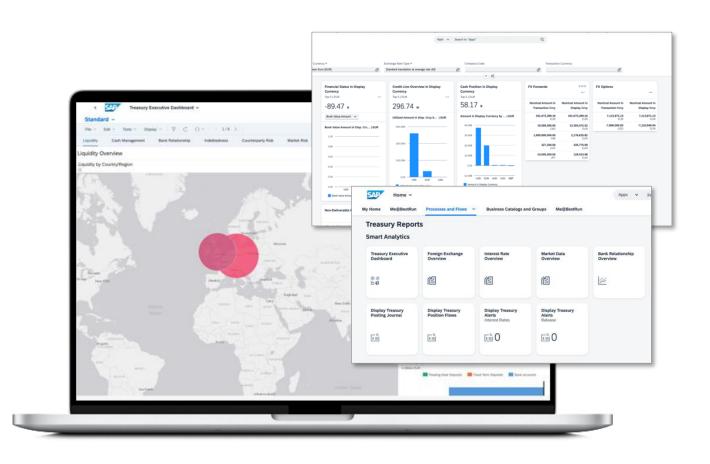

Reward suppliers for meeting specific ESG targets through the terms of the financing agreement, incentivizing ethical practices.

Analytics for Treasury Working Capital Management

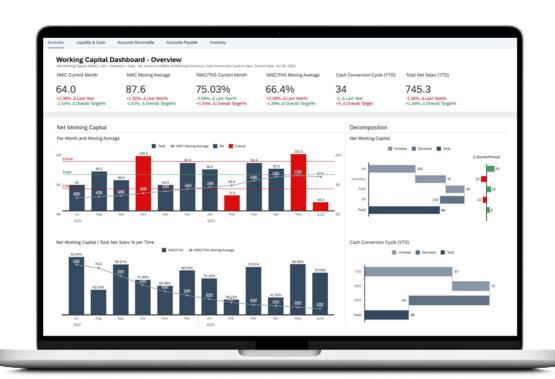

Provide Superior Analytics and Control

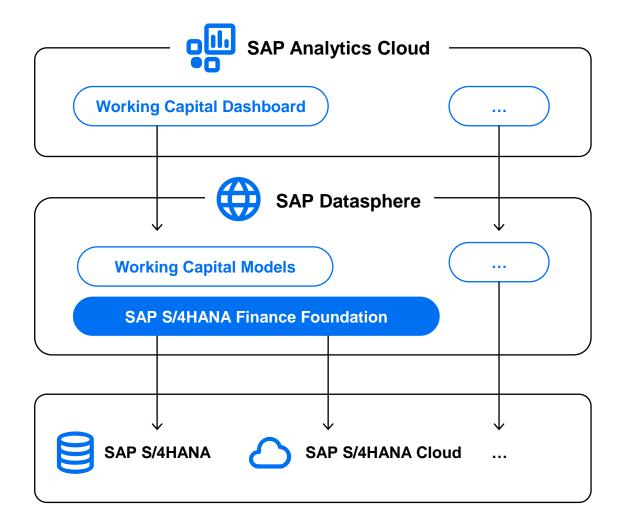

- Embedded daily reporting allowing to serve the need of daily business.
