

Embedding Sustainability into Financial Processes

The path to the green ledger and how Finance departments can lead the sustainability transition

Massimo Ciotola, SAP Finance Center of Excellence
Christian Butzlaff, SAP Chief Sustainability Solution Architect

Las Vegas

2024

SAPinsider

In This Session

- Discover SAP's mission to enable intelligent, agile and **sustainable** processes
- Discover SAP's visionary roadmap to the **Green Ledger**, anchored in transactional carbon accounting.
- Explore breakthrough capabilities that will transform how businesses are managed and **steered towards net zero**.

Agenda

- SAP's Mission & Strategy
- Compelling Events driving Sustainability
- Manage Compliance
- Improve Sustainability Quality
- Improve Sustainability Performance
- Wrap-up

Agenda

- **SAP's Mission & Strategy**
- Compelling Events driving Sustainability
- Manage Compliance
- Improve Sustainability Quality
- Improve Sustainability Performance
- Wrap-up

Our mission to enable a network of intelligent, agile and sustainable processes

Our mission to enable a network of intelligent, agile and sustainable processes

Turnkey visibility for Environmental, Social and Governance performance throughout the organization

- Operationalize sustainability as part of the business & steering model
- Report financial results including sustainability impact with confidence
- Enable resilient, sustainable, and profitable business models to protect long-term value
- Manage sustainability risks, policies and standards

SOXification of ESG

Applying the rigor of financial data to sustainability data

Data, Data, Data

- Automated
- Accurate
- Assured
- Auditable
- Attestable

Business transformation

Supply chain resilience

Sustainability outcomes

Why SAP?

SUSTAINABILITY xERP

Sustainability powered by ERP

Embed ESG data in
business processes to drive
sustainable change

No business becomes
sustainable until their business
processes become sustainable

Business transformation

Germany moves towards new 'plastics tax'

Following in the footsteps of countries such as Spain and the United Kingdom, Germany is now also introducing a 'plastics tax' of its own.

Plastic Packaging Tax raises £276m in first year £41m over target

Plastic Packaging Tax (PPT) receipts collected by HM Revenue and Customs (HMRC) in the financial year 2022 to 2023 totalled £276 million,...

SEC Climate Disclosure Rule

CSRD

Reinvent the “R” in ERP

Expand the definition of “resources” to record, report, and act on carbon in sync with financial data

The Path to the Green Ledger

For more information, read the **carbon accounting white paper** from SAP and World Business Council for Sustainable Development (WBCSD)

Record

Document account emissions with accuracy based on actuals along your supply chain

Report

Make emissions comparable with standardized reporting

Act

Reduce emissions based on carbon data in your existing business software

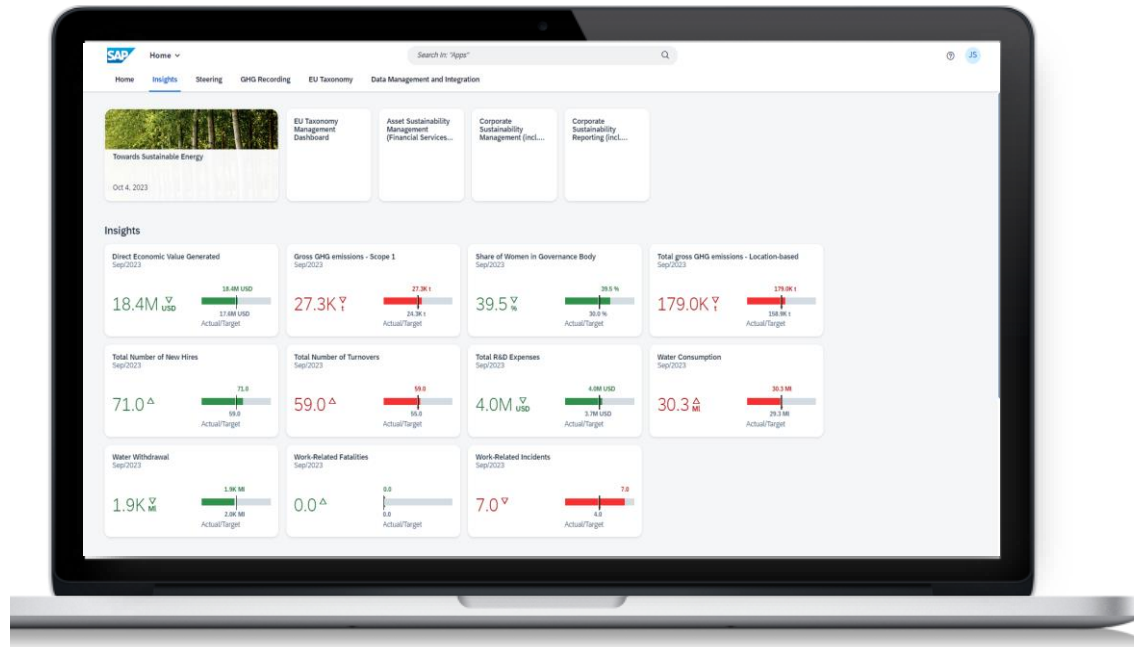

Agenda

- SAP's Mission & Strategy
- Compelling Events driving Sustainability
- **Manage Compliance**
- Improve Sustainability Quality
- Improve Sustainability Performance
- Wrap-up

SAP Sustainability Control Tower

Automated, Auditable, Compliant Reporting with Actual Data & Insights to Embed Sustainability into Business Processes

Record: Actuals instead of Averages

Record ESG factors with out-of-the-box integration with SAP systems for faster time to value & granular data visibility based on actual data, not averages

Report: Audit-ready ESG Metrics

Report regulatory-compliant ESG metrics covering common frameworks (e.g., GRI) based on an open & extensible solution with the largest ESG ecosystem

Act: ESG embedded Business Processes

Act by planning your future with actionable insights, forecasts and setting targets as well as tracking initiatives & changing business processes

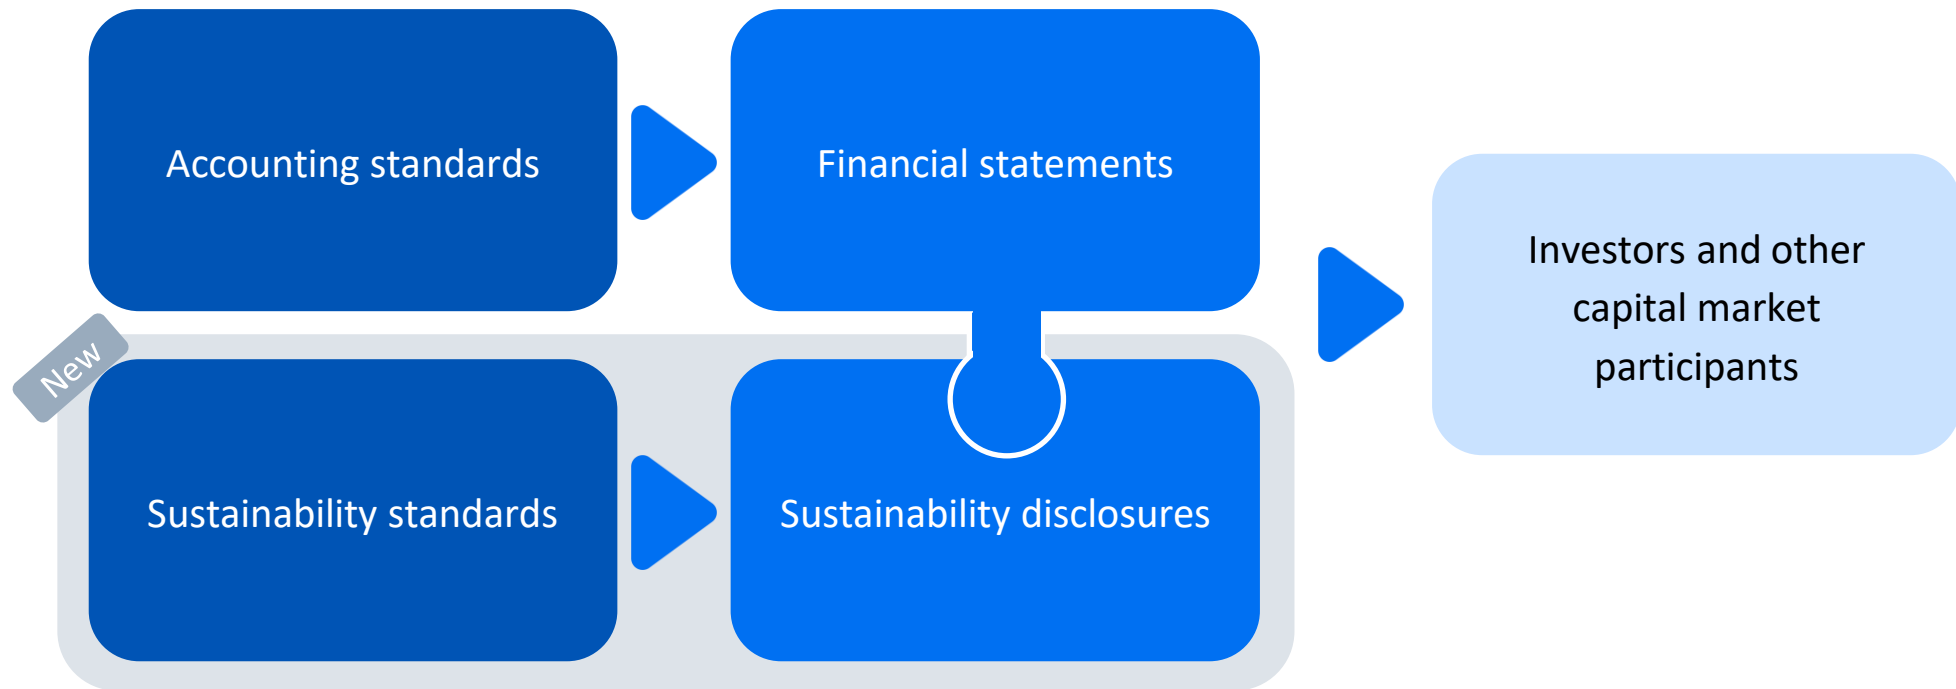

**"If you think compliance is expensive
- try non-compliance."**

Former U.S. Deputy Attorney General Paul McNulty

The evolution from financial to enterprise value reporting

Government Policy And Regulation

Carbon Might Be Your Company's Biggest Financial Liability

by Robert G. Eccles and John Mulliken

October 07, 2021

NEW HBR APP

<https://hbr.org/2021/10/carbon-might-be-your-companys-biggest-financial-liability>

Assume Scope 1&2 emissions of
500,000 MT CO₂e x \$50 \$/MT
= 25,000,000\$

Where is it?

Agenda

- SAP's Mission & Strategy
- Compelling Events driving Sustainability
- Manage Compliance
- **Improve Sustainability Quality**
- Improve Sustainability Performance
- Wrap-up

Our Vision: Manage carbon in sync with your financials

Transactional Carbon Accounting

Pioneering the Green Ledger

Record, Report, Act on carbon in sync with financial data for every business transaction

Unmatched Granularity

Drill-down into individual business transactions, like you would with financials, for effective budgeting and steering e.g. on cost center level

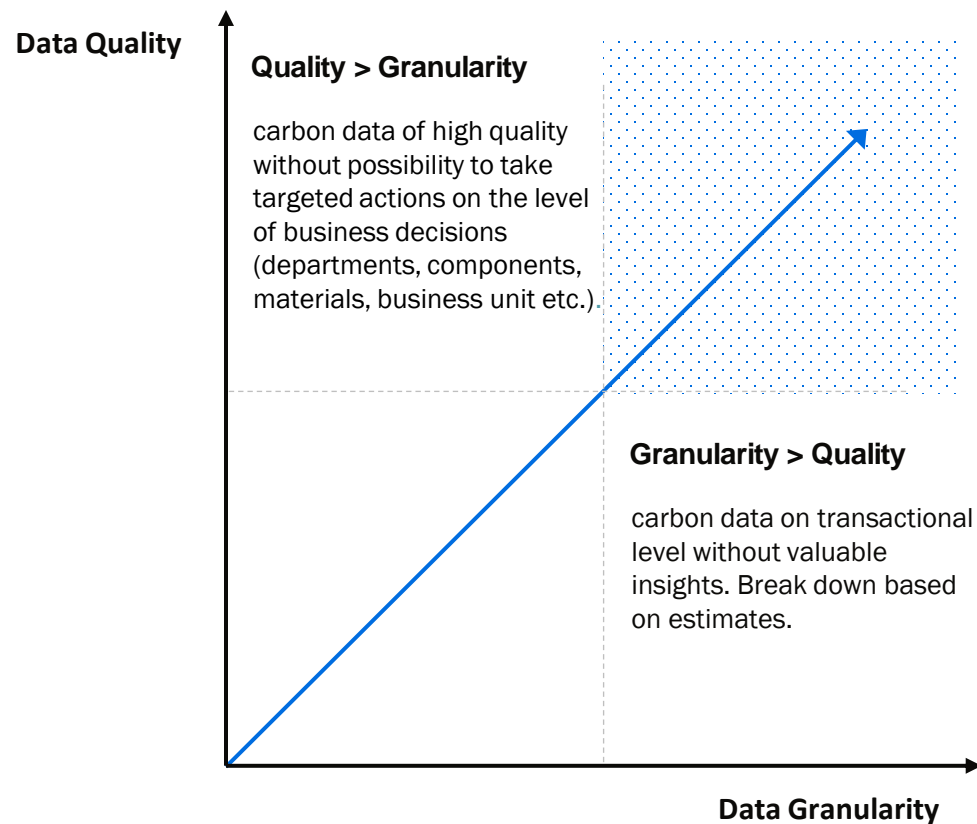

Unmatched Accuracy

Make reliable decisions and reports using standardized and accurate data based on actuals and a common accounting methodology

Unmatched Insights

Get carbon and financial data side by side to enable decision making at a required point in time

Green Ledger is not a goal in itself but part of the bigger story of our climate action portfolio

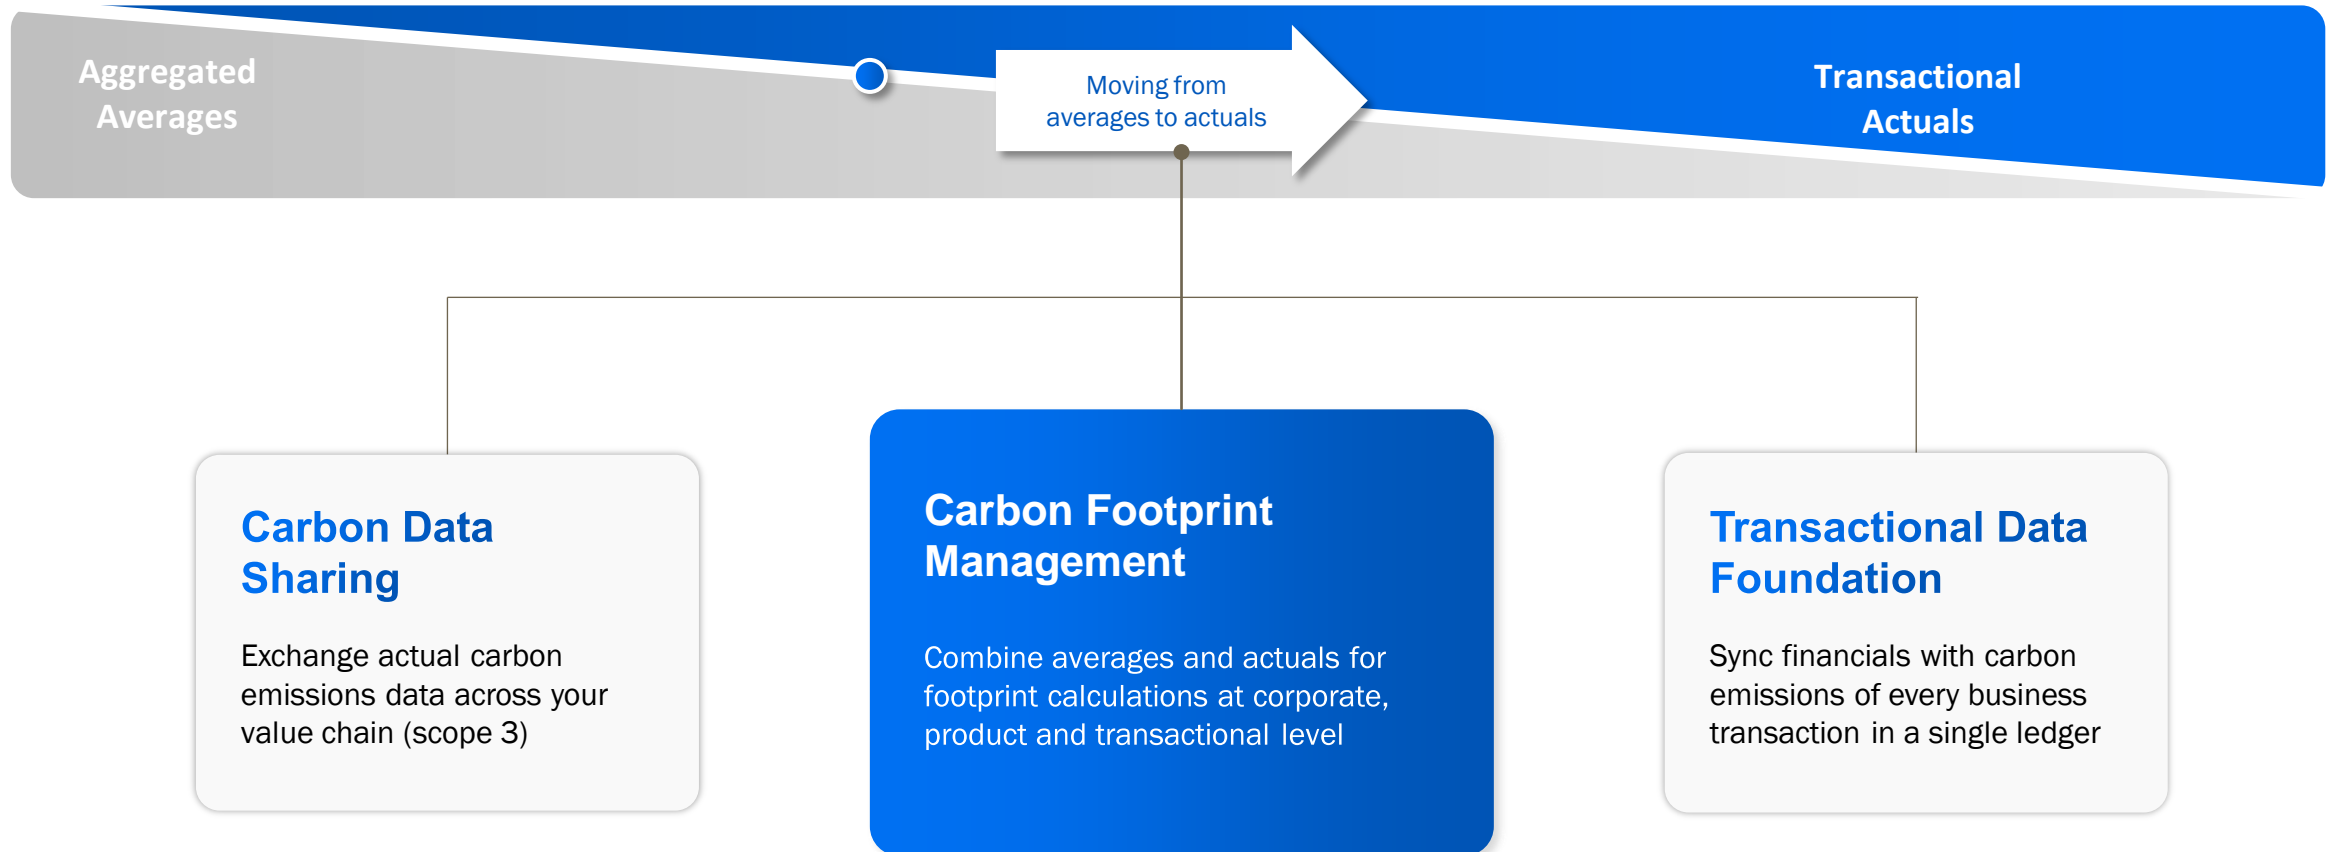

To drive targeted decision making companies need both: high quality data on a granular, transactional level

Move from averages to actuals towards transactional accounting

Build future-proof capabilities today

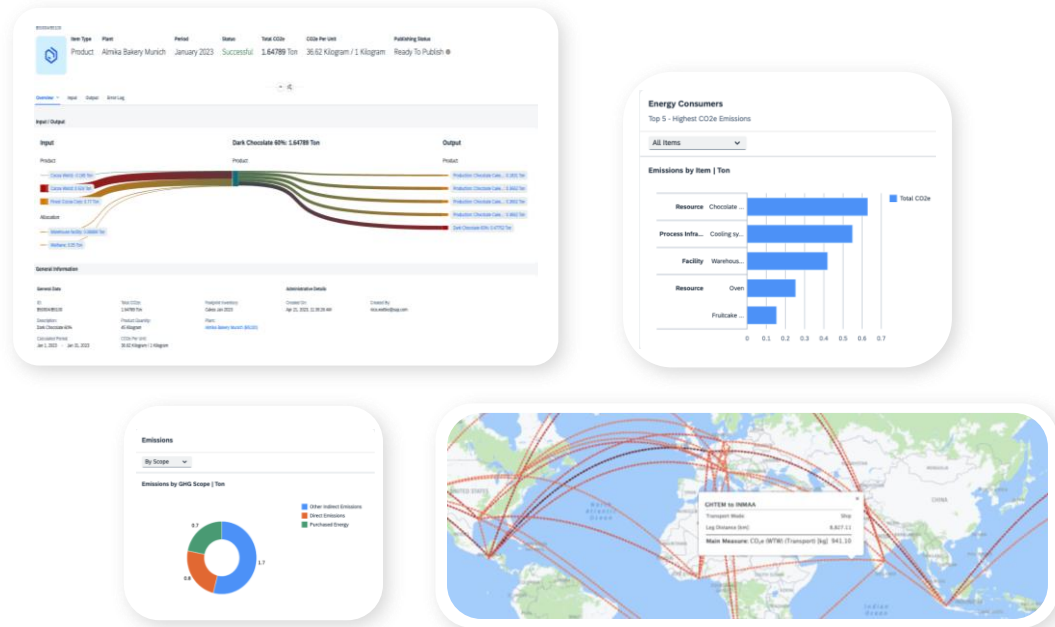

Transactional Carbon Accounting – **Pioneering the Green Ledger**

SAP Sustainability Footprint Management

Climate Action
Reducing Emissions

Decarbonize your value chain with carbon accounting software that calculates your corporate and product carbon footprint

Sustainability Frameworks and Databases (excerpt)

Greenhouse Gas
Protocol

RECORD: Easily leverage existing data with seamless integration and automation

Seamlessly integrate data from SAP S/4HANA, 3rd party data, supplier data, and facility energy flows for data acquisition and footprint distribution.

REPORT: Get auditable corporate and product carbon footprints at scale

Assess your sustainability footprint with granular cradle to gate carbon footprint calculations that consider materials, transportation, and production.

ACT: Decarbonize along business processes through granular transparency

Act on your reduction targets with carbon accounting software that supports Scope 1, 2 and 3 transparency and generates analytical insights from footprint data.

SAP Sustainability Data Exchange

Achieve carbon neutral supply chains by requesting and sharing carbon data

Climate Action
Reducing Emissions

130 kg CO₂e (11%)

Fossil Greenhouse Gas Emissions

4270 kg CO₂e (89%)

Collaborate across your value chain

Enable sharing of actual product carbon footprints (PCF) across value chains with increased interoperability and data sovereignty of data owners

Standardize data exchange

Simplify audits with standardized data models and workflows and exchange information seamlessly following industry frameworks and requirements

Accelerate carbon reduction

Identify products or processes with high potential for CO2 reduction, avoid double emissions counting, and optimize footprints

In collaboration with

SAP Business
Network

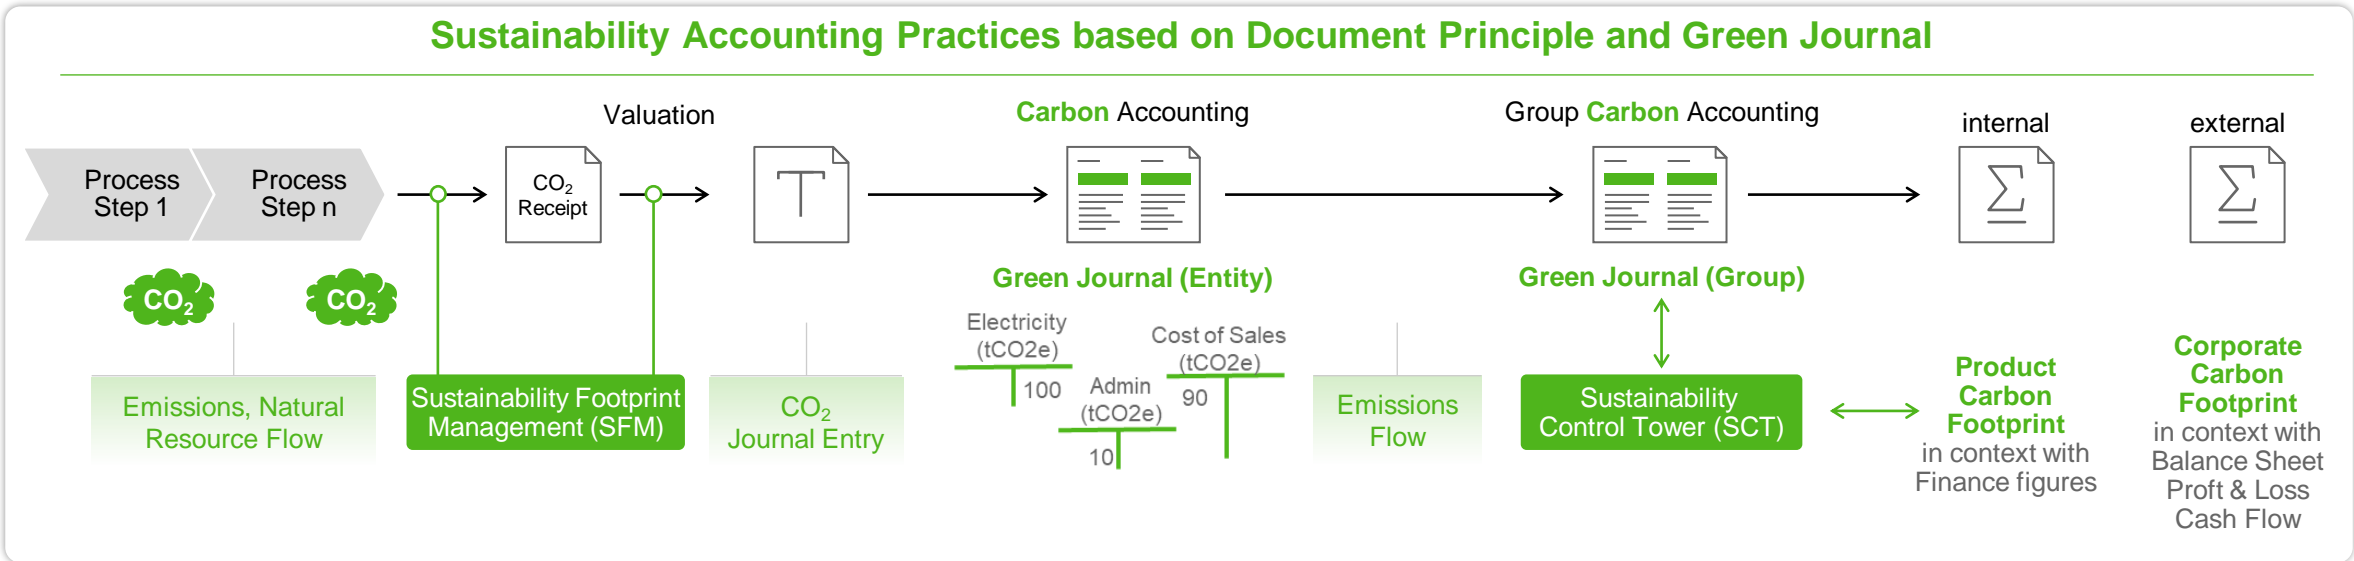

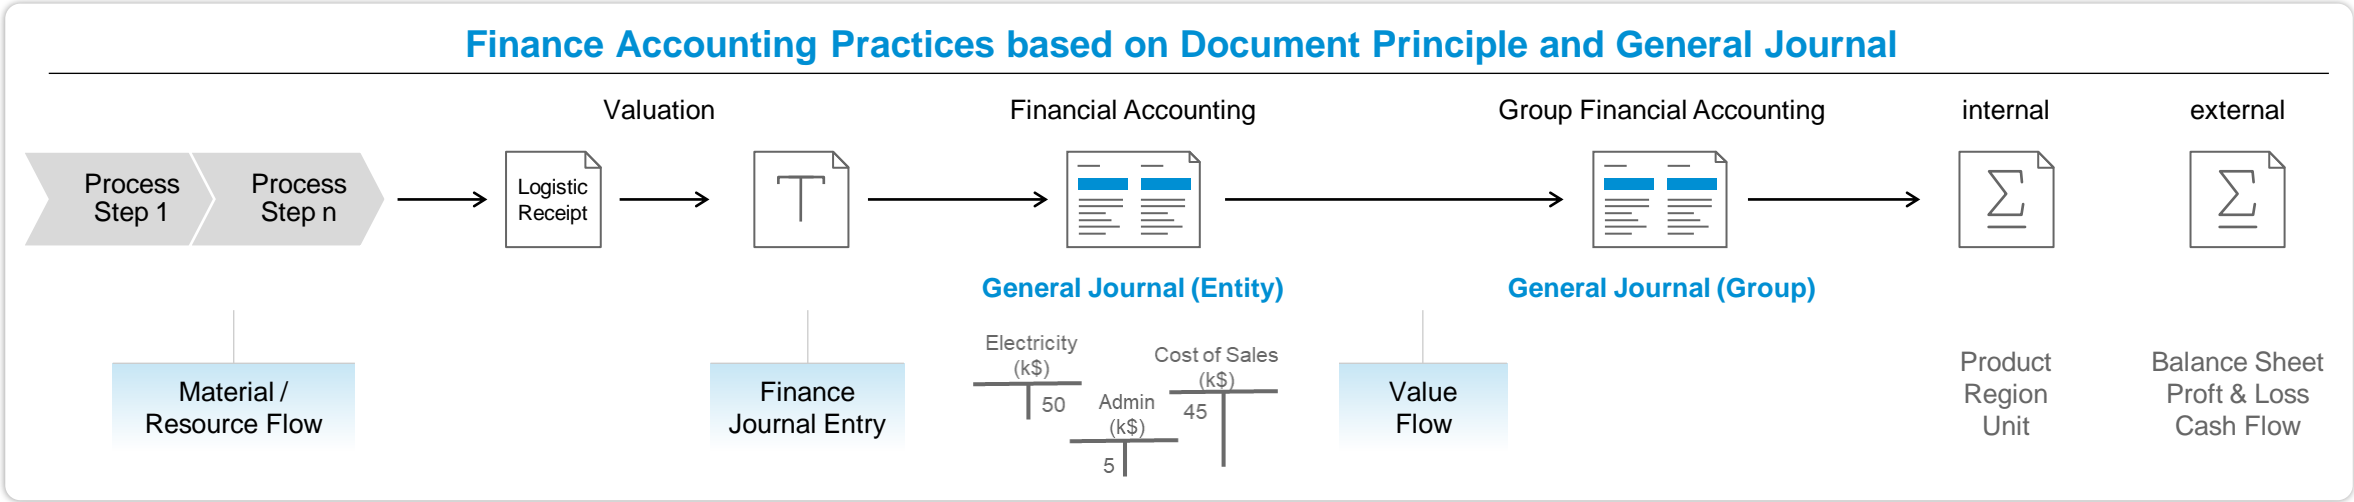

The Path Towards Green Ledger Starts Now

Identify to reduce your **Carbon Liability**

To drive targeted decision making companies need both: high quality data on a granular, transactional level

Finance Accounting as Blueprint for Carbon Accounting

Agenda

- SAP's Mission & Strategy
- Compelling Events driving Sustainability
- Manage Compliance
- Improve Sustainability Quality
- **Improve Sustainability Performance**
- Wrap-up

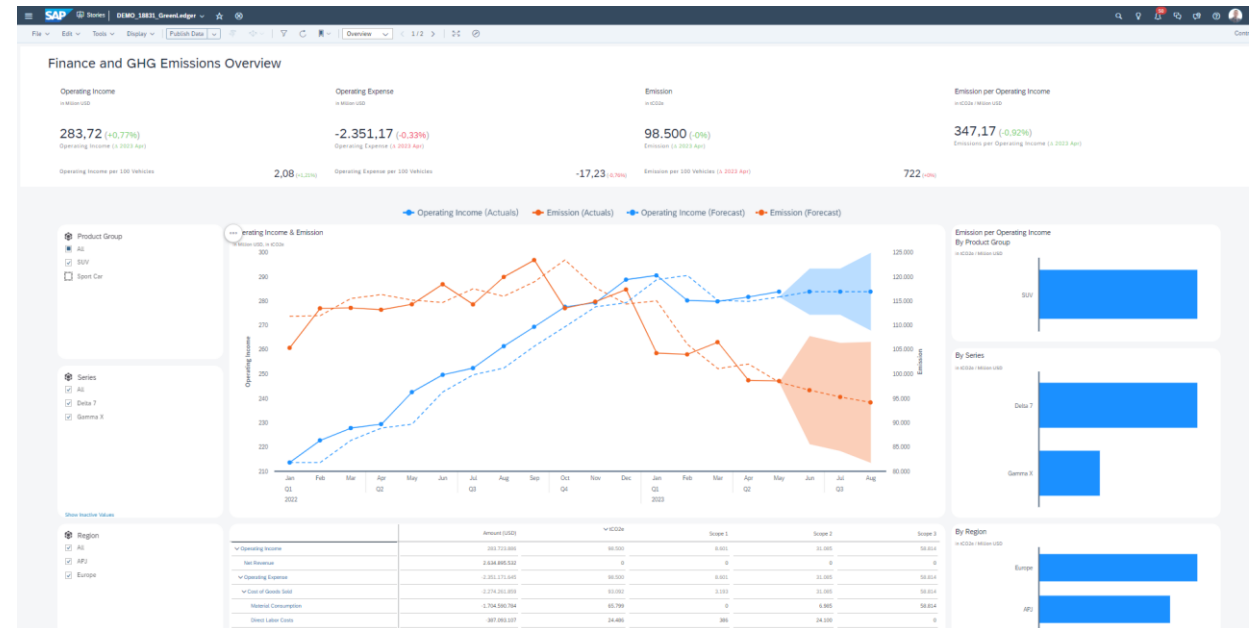

Green Ledger Can Help...

INTERNAL – Labs
Preview

...to answer questions like:

- **What is your Carbon Liability?**
- **Which business area, cost center, profit center, segment, product group, sales organization, distribution channel (...) emits most greenhouse gases per \$ revenue you earn there?**
- **What are the main drivers for emissions in the company?**
- What is the financial impact of choosing different suppliers or investing in “greener” machines or processes?
- What would be the financial impact of a carbon tax?
- **Which cost centers, profit centers exceed their carbon budgets?**

Value Proposition for Green Ledger

- Comply with upcoming reporting standards (ISSB, SEC, EFRAG)
- Ensure audit-proof accounting for Greenhouse Gas quantities in finance quality
- Steer business towards a decarbonized economy by understanding and analyzing environmental and financial performance in a connected manner
- Simulate financial impact of carbon taxes, prices of emission certificates and emission reduction measures
- Leverage the power of linking finance and emission data

Embed sustainability into enterprise performance management

Better decision foundation towards net zero

- Steer towards a decarbonized economy by understanding and analyzing environmental and financial performance in a connected manner
- Bring carbon data into correlation to financials to drive change

Accelerate and master the sustainability transformation

- Operationalize carbon quantities and impact as part of the business & steering model (ESG adjusted decision making)
- Add sustainability data into the ERP business structures like cost centers, profit centers, accounts etc where decisions are taken

Analyze, plan and forecast company value

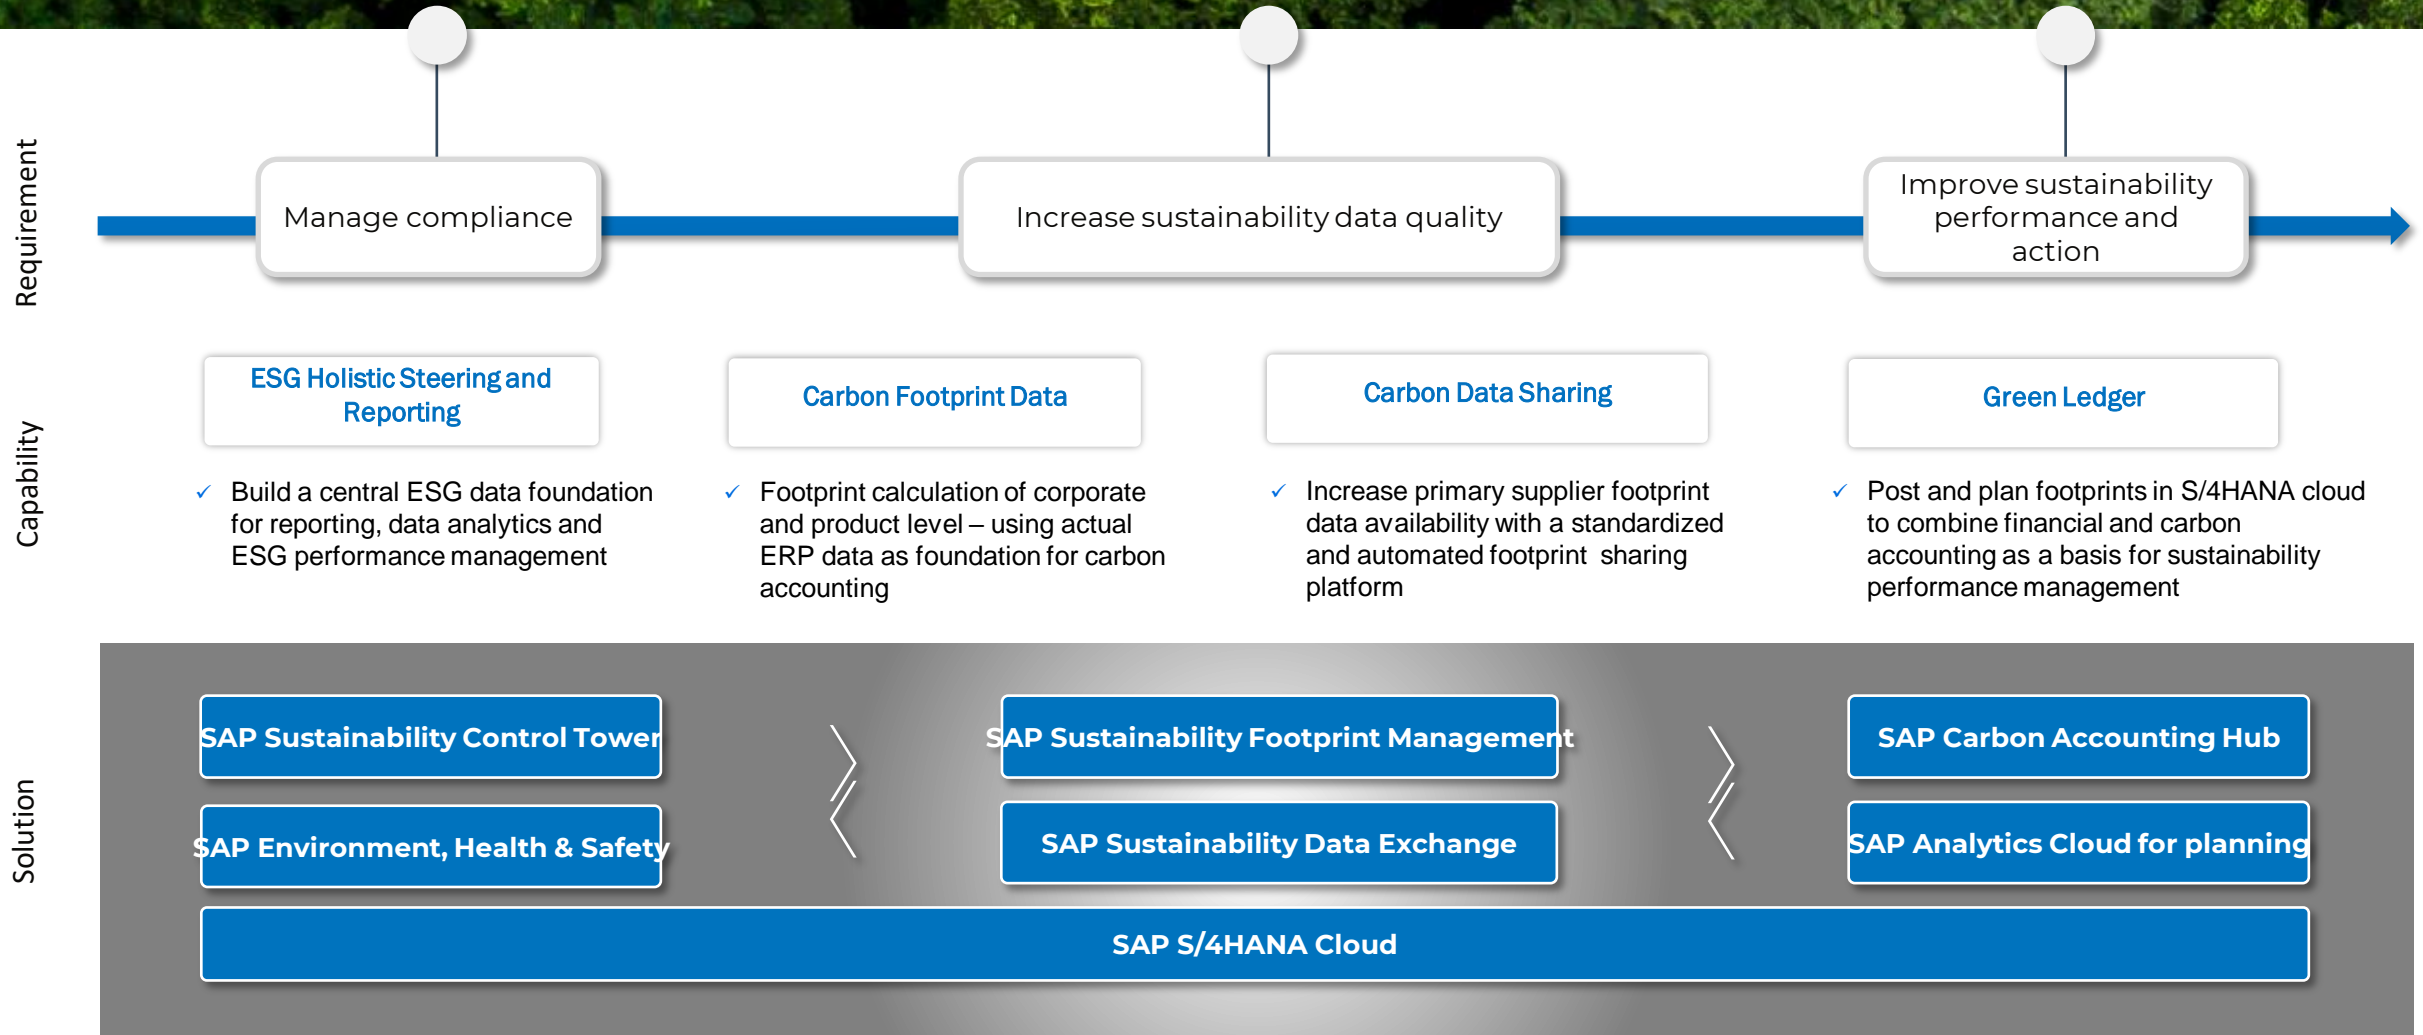

- Integrate financial, ESG and value reporting into reporting and analytics
- Analyze and plan financial and sustainability value driving factors in combination with each other

Agenda

- SAP's Mission & Strategy
- Compelling Events driving Sustainability
- Manage Compliance
- Improve Sustainability Quality
- Improve Sustainability Performance
- **Wrap-up**

Sustainability Customer journey

We are the right partner for your sustainability journey

Most comprehensive portfolio with holistic vision

Embed sustainability into your business DNA with our **extensive range of solutions** while **evolving** towards a **Green Ledger**¹

Seamless E2E integration into business processes

Leverage **SAP systems**² with embedded ESG solutions to **gather the required data** (scope 1-3) in good quality **along your supply chain**

Industry specific solutions & networks

Knowing your **industry specific challenges** we provide the right solution & **connect you with the largest network**

Key Points to Take Home

- ✓ SAP provides solutions to enable intelligent, agile and **sustainable** business processes
- ✓ You can **start today** with solutions like SFM and SCT, enabling your business for the Green Ledger
- ✓ The Green Ledger initiative will provide you with **audit proof** GHG accounting, it will **combine** finance and emission data on transactional level and **simulate financial impact** of carbon taxes and prices.
