RFgen

THE GILL CORPORATION

Digital Inventory in Action with Global Food & Beverage Corporation

Global food and beverage giant modernized inventory control at multiple factories with digital inventory and traceability.

The Challenges

- Manual processes at multiple operation types (paper, old RF, etc.).
- Outdated RF scanning solution.
- Compliance with FSMA 204.

Before RFgen, if a certain employee took a day off, production would literally slow down.

- Director, Supply Chain Visibility

The Objectives

- Compatible with Azure environment.
- Adaptable and consistent across locations.
- Configurable with a highly flexible platform-based architecture.
- Designed and deployed in just three days per site.

“

As a food manufacturer, we have to be able to quickly provide information to the FDA or an auditor when they ask for it.

- Director, Supply Chain Visibility

The Results

- FSMA rule 204 traceability compliance.
- Standardized workflows with repeatable processes.
- Digital transformation.
- Inventory accuracy and visibility.

As soon as we turned RFgen on in one plant, it gave us instant visibility right away.
