Key Points to Take Home

- The challenges that businesses are seeking to solve around AI are with their data. To make their data readily available for AI agents and LLMs, the data needs to be readable, transformed, accessible, and trusted.
- Through Boomi, this is made possible by our core pillars. API management is needed to extract the correct data, along with advanced integration capabilities to map and transform the data, and a master data management tool to ensure data is trusted and has governance around it. We empower our customers to bring applications, data, APIs, and AI models together to embrace AI and transform their business.
- Boomi for SAP natively integrates with the SAP application layer as a certified add-on that leverages SAP logic and security.
 Historically, SAP data is very tricky and cumbersome to extract, but it is done seamlessly with Boomi.
- Utilize SAP events via the Boomi for SAP connector to ensure that AI models are hydrated with new SAP data and synchronized in real-time.
- The Boomi Enterprise Platform is ideal for AI Orchestration and is uniquely positioned to provide context from the enterprise and act.
- Ingest data into a Conversational Finance AI model to help financial professionals make sense of their data, answer financial queries in real-time, and uncover valuable insights.

Thank you! Any questions?
