ReleaseOwl®
Native DevOps Platform for SAP

ReleaseOwl - The #1 Native SAP DevOps Platform

Designed to streamline SAP processes, enabling high-quality releases by incorporating end-to-end DevOps through integration, orchestration, and automation.

One Platform
Manage ECC, S/4HANA, BTP, CPI, and SAC releases efficiently

Capabilities
Automate, Orchestrate, and Integrate

Out-of-Box Integration
Seamless integration with Jira, Azure DevOps, and ServiceNow

SaaS Platform
No infrastructure required. Enhance scalability/ flexibility

Automated Release Pipelines
Define change and release management with approvals

Test Automation Integrations
Tricentis TOSCA, Worksoft, HCL OneTest and more..

Advanced Transport Management for ECC, S/4HANA

- Transport Management
- Impact Analysis
- Web-Based Retrofit and Conflict Resolution
- Integrations with ATC, Code Inspector & gCTS

CI/CD Pipelines for SAP BTP

- Automated CI/CD Pipelines
- Robust Packaging & Deployments for MTAR, CAP & RAP
- Security Scanner for malware detection

Secured & Accelerated Development for SAP Integration Suite

- Automated Packaging & Deployments
- CPI Governance & Rule Engine
- CPI Regression Test Generator

Streamlined Release Management for SAC

- Automated Deployment for SAC Packages
- Versioning and Downgrade Protection

Deployment Multiverse

ReleaseOwl
Native DevOps Platform for SAP

ONE Deployment Request

- Packages → SAC
- iFlows & Value Maps → SAP IS (CPI)
- MTAR → SAP BTP
- Transports → S/4HANA
- Transports → ECC

ReleaseOwl's Deployment Multiverse is a game-changing solution designed to streamline the entire SAP application deployment process. It offers a one-stop solution, allowing deployment of all SAP application artifacts with a single request.

Metrics Driven DevOps Maturity

DORA Metrics: Built-in DORA metrics for continuous improvement, tracking deployment frequency, lead time, and change failure rate.

Testing Metrics: Test coverage, defect density, and regression test effectiveness for quality assurance, with predictive analytics to anticipate risks.

Real-time Reporting: Access dashboards and reports on DORA and testing metrics for data-driven decision-making.

Benefits

Faster Time-to-Market: Streamlined release processes and automation accelerate software delivery, enabling quicker market response

3X

75%

Reduced Downtime: Standardized release pipelines and automation ensure consistent release quality and reduced defects

Risk Mitigation: Built-in compliance checks help mitigate risks, ensuring regulatory compliance, and reducing business disruptions

0

3X

Return on Investment: Optimized release processes and reduced manual effort maximize ROI in SAP investments
