

# Maximize Your SAP® S/4HANA Investment

## Cadency and SAP® S/4HANA: The Perfect Pair

SAP® S/4HANA supports broad enterprise functions but lacks specialization in the financial close process. Trintech's Cadency Platform fills this gap, automating tasks, enforcing best practices, and accelerating close cycles for quick ROI. It complements SAP® S/4HANA with targeted controls for period-end activities.

Here's how they work together:

SAP® S/4HANA	Trintech's Cadency Platform
 <b>Significant and Strategic Investment:</b> Implementing and maintaining SAP® S/4HANA involves a significant and strategic financial investment, often providing little ROI and/or long payback periods.	 <b>Streamlined Data Handling:</b> Allows for faster implementation and enables faster realization of benefits specific to the financial close, delivering targeted improvements.
 <b>Broad Functional Scope:</b> Comprehensive capabilities spanning finance, supply chain management, manufacturing, sales, procurement, and more.	 <b>Best-in-Class Tailored Features:</b> Provides specialized features that are specifically designed to handle the complexities of the financial close, ensuring a more streamlined and accurate process.
 <b>System of Record:</b> A cohesive system that interacts with other enterprise applications and systems to provide a holistic view of the business. Provides limited control and governance.	 <b>System of Control:</b> Offers necessary oversight and management specifically suitable for a system of control for your financial close activities.
 <b>Cohesive Ecosystem:</b> Robust ecosystem built for enterprise-wide operations and complexity.	 <b>Agnostic and Scalable:</b> Integrates easily with existing systems and allows for a modular scalable approach, enhancing flexibility and tailoring controls to meet period-end requirements.
 <b>Significant Time and Resources to Maintain:</b> Implementing SAP® S/4HANA is a strategic project that requires a significant amount of time and resources to roll out and maintain.	 <b>User Empowered: Self Configuration</b> Empowers finance teams to easily configure the system to meet their specific needs, without heavy reliance on IT.

## How It Works

Cadency's pre-built SAP-certified connector automates the flow of financial data, enabling real-time posting and reconciliation. By automating routine tasks like journal entries and bad debt analysis, Cadency reduces manual intervention, saving time and minimizing errors. The built-in scheduler and dashboard visibility empower users to manage workflows more efficiently, providing a streamlined and transparent close.

## The SAP® S/4HANA Migration Journey with Trintech

### Before

Standardize financial close processes, ensuring clean data across the organization for seamless ERP integration.

### During

Automate workflows and gain real-time insights, driving operational efficiency and reducing manual tasks.

### After

Optimize financial close processes using pre-built templates and automation, improving controls and allowing your team to focus on high-value tasks.
