PROVEN B2B SOLUTIONS TO MANAGE WORLDWIDE ENTERPRISE PAYMENTS

Providing convenient payment options to customers is critical. But these systems must be protected from security breaches, compliant with regulations and tightly integrated across a mesh of global systems. With so many moving parts – there's no margin for error.

That's why Worldpay is the trusted B2B payments partner to the most recognized global brands. Paymetric – Worldpay's complete B2B payment solution – is the only payments engine built for the complex needs of global Enterprises.

ONE GLOBAL SOLUTION FOR ALL PAYMENT PROCESSING

Paymetric brings together all of your internal payment systems into one platform to streamline and simplify processing and reporting. SAP, Oracle, Salesforce and other ERPs are seamlessly integrated into one global solution that enables you to accelerate order-to-cash, increase acceptance rates, secure your systems and reduce PCI burden. Paymetric's deep industry expertise ensures successful implementations and our consulting services team is there 24/7 to provide ongoing support to solve any payment, security, compliance or integration challenge. SINGLE END-TO-END SOLUTION

Paymetric provides an unmatched, integrated platform. Global Enterprises can leverage the intelligence of the largest processor in the world to maximize processing revenue while reducing costs.

MORE REVENUE

With unparalleled access to data, you will increase revenue through higher acceptance rates and process innovations. You will also keep more revenue through lower operating costs and improved fraud protection.

GLOBAL EXPERTISE

Your Enterprise will gain worldwide market share with improved customer payment experiences. Worldpay is the #1 global acquirer offering local expertise across 146 countries, supports 300+ local payment methods and provides access to ERPs, including SAP, Oracle and Salesforce certified integrations with Paymetric.

A HUMAN TOUCH

Our global support team is available 24/7 with expert advice wherever you need it. Let our Optimization team show you how to lift acceptance rates up to 5% and reduce B2B interchange rates up to 30%.

POWER YOUR PAYMENTS WITH EXPERTISE YOU CAN TRUST

Our omnichannel global processing capabilities and B2B Value Added Solutions give you more...unlock their potential to increase and protect your revenue, reduce costs and grow with experts.

3DS FLEX: ADVANCED AUTHENTICATION

Increase issuer approvals for transactions affected by PSD2, while reducing friction at checkout. Protect revenue and offer a frictionless checkout with our strong customer authentication solution.

AUTHMAX: CONVERT SALES AND SAVE

Enhance your authorization strategy with AuthMax. We've combined our knowledge of global markets with a cutting-edge analytics engine. The result? A solution driven by data science, incorporating numerous authorization-related factors in real-time with one goal: optimizing approvals. With a simple implementation and no coding investment required, you start capturing higher approvals and more revenue almost immediately.

RECOVERY: CONVERT EVEN MORE SALES

Card re-issuance can cause up to 30% of stored card details to be obsolete within a year. Our recovery service is specially designed to handle this challenge, with sophisticated account updating that maximizes approvals by keeping stored cards current. You won't have to change processes, and your shoppers won't need to take any action.

FRAUDSIGHT: INNOVATION THAT PROTECTS

Leverage our vast transaction visibility, best-in-class machine learning technology and global expertise to stop bad transactions and let good transactions through. Built upon industry leading machine-learning technology, FraudSight dynamically monitors transactions in real-time during the authorization process.

ISSUER INSIGHTS: GROW WITH EXPERTS

With 48.6 billion transactions processed annually, Worldpay can empower you to turn payments into a strategic advantage. Issuer Insights is our powerful tool that provides a window into issuers' information and performance. This knowledge turns into opportunities to identify trends and patterns specific to customers, and ultimately boost your approval rates.
