SAP Business Suite

The future of enterprise management

Realizing our vision by bringing together applications, data, and AI

SAP brings all components together to lead the way into the next era of enterprise management

Joule
as the new super orchestrator across end-to-end processes

SAP Business AI

Joule
SAP Foundation Model
SAP Knowledge Graph

- Finance **agents**
- Analytics **agents**
- CX **agents**
- Supply chain **agents**
- HR **agents**
- Spend **agents**

30% efficiency increase

SAP Knowledge Graph

Unrivaled AI

AI embedded in business processes

SAP Business Data Cloud

One semantical layer
Data products

Finance data products	Supply chain data products	HR data products	Spend data products	CX data products

Semantically aligned SAP and non-SAP Data Products

360°

databricks

Unmatched Data

100% accurate and secure business data

SAP applications

Cloud ERP and business applications

- Financial management
- Supply chain management
- Human capital management
- Spend management
- Customer experience

Non-SAP applications
with structured and unstructured data

Unparalleled Applications

Integrated Suite across SAP & non-SAP apps

powered by **SAP Business Technology Platform**

Unparalleled Applications

One suite of applications with seamlessly integrated business processes
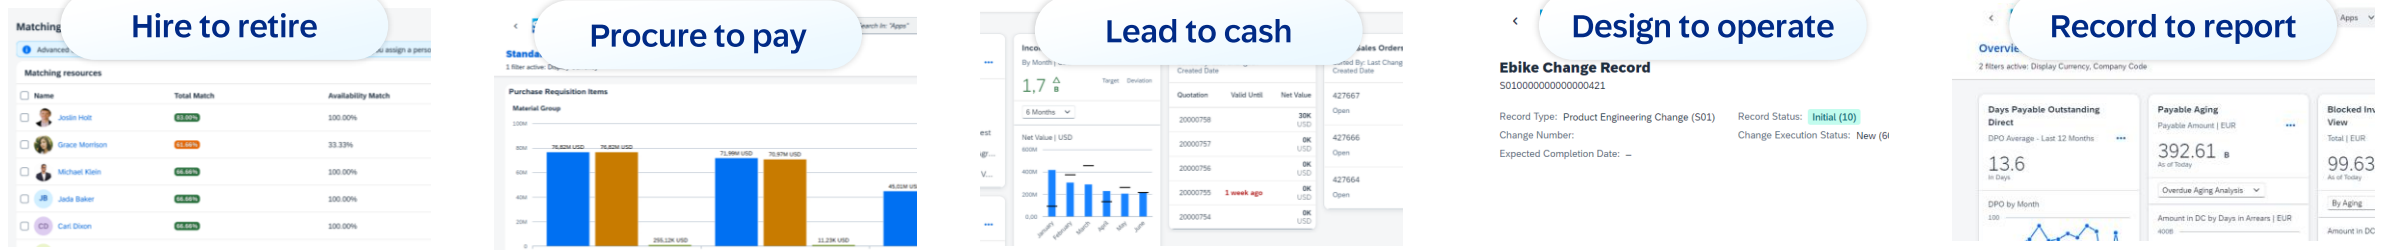

Comprehensive

Power end-to-end business processes with the most comprehensive, integrated portfolio of applications

Extensible and integrated

Easily connect and extend applications with generative AI powered development, automation, and integration solutions

Industry-specific

Tailored solutions for all industries, built to meet unique business needs

Hire to retire

Procure to pay

Lead to cash

Design to operate

Record to report

Business Technology Platform

Integrate all your business processes

Build and extend with confidence

Achieve enterprise automation

SAP Integration Suite

Connect all your SAP and non-SAP systems with a comprehensive integration solution. Accelerate time to value with pre-built integrations.

SAP Build

Empower developers to use tools and languages of their choice with generative AI, optimized for business application development.

Enterprise automation with SAP

Improve business processes with industry best-practices. Rapidly automate for accuracy and efficiency.

SAP Business Technology Platform

Extend & integrate to meet your differentiating needs

Differentiation is key:

Extend

Key value prop:
Easily extend business processes and applications to build your business differentiation

Easy configuration	Adapt screens, fields, reports	Embedded ABAP extensibility

SAP Cloud ERP

AI Foundation Tools	Low/no-code tools	Developer tools

SAP Business Technology Platform

Integrate

Integration principles: predefined, open, holistic, and AI-driven[1]

Consistent security and identity management
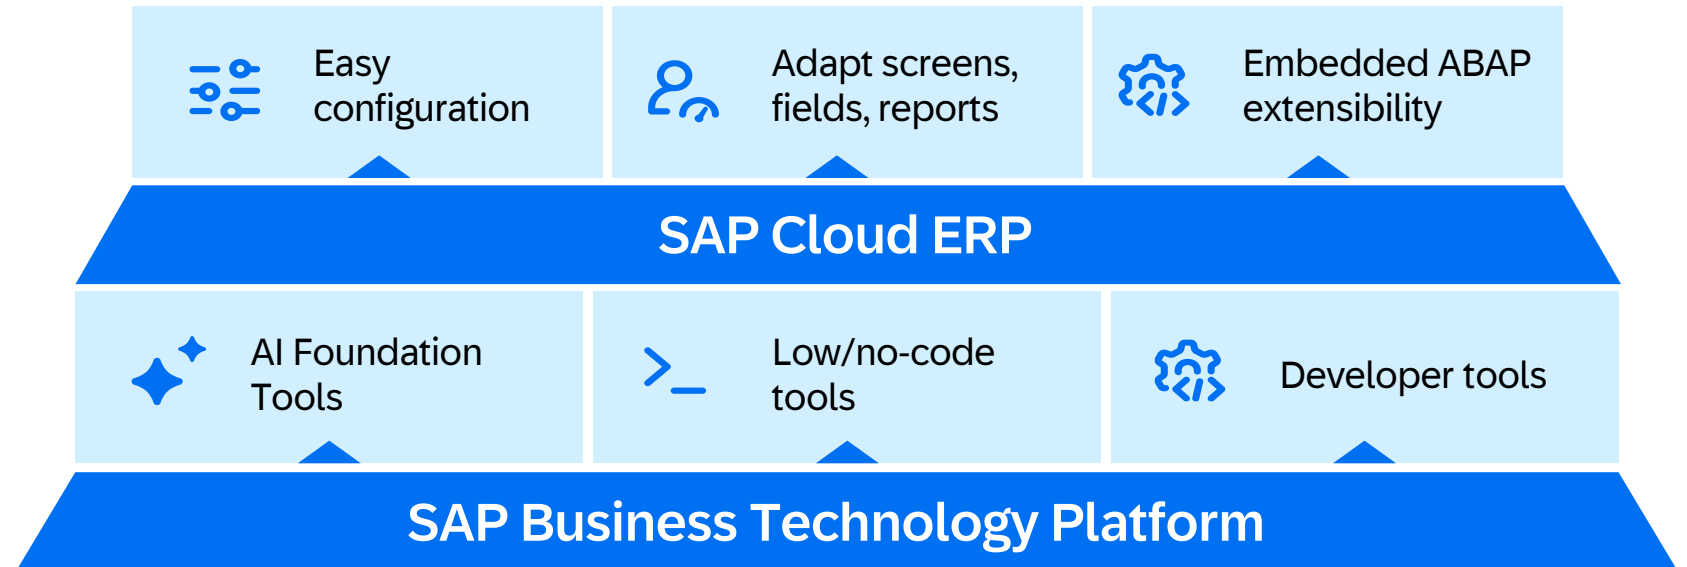

750+
pre-built integrations to SAP S/4HANA Cloud Public Edition

700+
pre-built, open APIs (API library)

6,000+
reusable (CDS) views exposed as the virtual data model that are the basis for data access in analytics, applications and integrations

Understanding the unprecedented challenges your business faces

Each challenge is unique, yet they all demand more intelligent and connected technology solutions to succeed
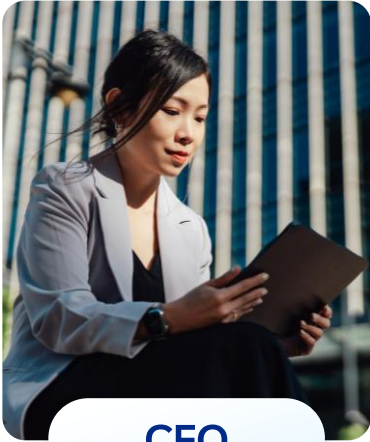

CFO

Steering transformation by balancing growth and profitability

Delivers real-time financial insights across solutions

CPO

Optimizing cost, quality, availability and sustainability

Provides unified visibility and automation across the entire procurement landscape

COO

Running resilient global supply chains amidst constant disruptions

Empowers connectivity across global operations and proactive responses to disruptions

CHRO

Retaining and engaging talent as skills requirements evolve

Enables personalized employee experiences and proactive skills development

CRO

Meeting rising customer expectations

Standardizes processes across all customer touchpoints, enabling personalized, real-time experiences and seamless customer journeys
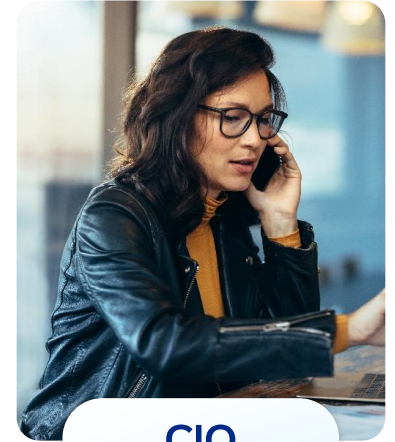

CIO

Delivering modernization and AI-powered innovation at the same time

Is an intelligent platform that seamless connects diverse systems with AI-assisted features and pre-built content

Integrate everything to innovate now

- **Accelerate connectivity for faster time to value** with thousands of proven integrations built and maintained by SAP, while applying a systematic approach to integration that includes built-in support for best practices.

- **Integrate everything to accelerate innovation** with a single, robust solution for multiple integration modes and enterprise-grade capabilities.

- **Connect everyone with automated processes** in real time, providing situational awareness, scale, and high performance, regardless of organizational boundaries.

SAP Integration Suite

Trusted solution to scale our customer's business

Leader
in the iPaaS Gartner MQ 2025 for the 5th time in row

14.6k+
Customers

10.5k+
Business Accelerators to speed up integrations

250+
3rd party adapters

Leader
in IDC MarketScape for B2B Middleware

75%
of deployed integration scenarios are with non-SAP connectors

1.4k
Business Events (operations)

557k+
Systems & applications connected

1.8 Million
Deployed integration flows

30 Billion
Messages and API calls processed monthly

Achieve excellence with a modern, scalable, and secure iPaaS

Integrate with one solution

Accelerate productivity

Top 10 reasons to choose SAP´s Integration Suite as your comprehensive enterprise-wide integration platform

1 **Versatile and enterprise-grade integration platform** covering all integration styles and patterns: A2A/B2B/B2G, APIs, events, digital integration hub, digital ecosystems

2 **Proven prebuilt integrations**, APIs, events, domain models to jump-start your integration projects

3 **Rich set of connectivity options** and standard adapters for A2A and B2B/B2G integration, 250+ **connectors** for SAP and non-SAP integrations

4 **Vendor-managed multi-cloud service in major hyperscalers** as well as customer-managed service providing flexibility to run integrations across multiple environments including private landscapes

5 Simplify the process of **business partners collaboration** with the **power of artificial intelligence**

6 Benefit from SAP's **continued innovation and long-term commitment** to simplify and accelerate enterprise integration

7 **Strong focus on enterprise-grade security** such as data isolation, multitenancy, content encryption and signing, single sign-on, and secure on-premise connectivity

8 Share and learn from a **community and partner ecosystem**

9 Offers **real-time event streaming** that enables an enterprise-wide EDA strategy with flexible broker deployments satisfying high scalability and resilience

10 **SAP Integration Solution Advisory Methodology** with strong customer focus to make our customers run better
