

SAP'S LIFE SCIENCES INDUSTRY SOLUTIONS

Life sciences software from SAP and its partners

Cloud ERP

Business Insights

Boost efficiency, cut costs, and enhance quality with real-time inventory and supply chain insights for life sciences organizations.

[Explore SAP S/4HANA Cloud](#)

Central Finance

Advance personalized healthcare by connecting life sciences and healthcare data and automating predictive forecasting processes.

[Explore SAP S/4HANA for central finance](#)

Migration to Cloud ERP

Support future growth with a modern cloud ERP solution, as well as tools and services to support a successful migration.

[Explore RISE with SAP](#)

Sustainable Design

Incorporate circularity into your life sciences supply chain and create corporate sustainability models.

[Explore SAP Responsible Design and Production](#)

Clinical Operations

Clinical Supply Management

Revolutionize the drug development process and streamline manufacturing and distribution channels.

[Explore SAP Intelligent Clinical Supply Management](#)

Batch Release Processes

Streamline batch release operations and empower quality teams to exert control over huge volumes of batch release data.

[Explore SAP Batch Release Hub for Life Sciences](#)

Enhanced Track and Trace

Provide a secure network to exchange serialization data and simplify the distribution of medicines in compliance with regulations.

[Explore SAP Advanced Track and Trace for Pharmaceuticals](#)

Cell and Gene Therapies

Orchestrate supply chain execution for cell and gene therapies and connect business processes to create greater visibility.

[Explore SAP Cell and Gene Therapy Orchestration](#)

Supply Chain Management

Integrated Business Planning

Streamline planning and improve supplier collaboration by working on forecasts and purchase orders within a single platform.

[Explore SAP IBP for Supply Chain](#)

Product Lifecycle Management

Accelerate product development, speed time to value, and reduce costs by connecting activities across your supply chain.

[Explore product lifecycle management solutions](#)

Business Networks

Connect companies and institutions across your value chain to improve planning, inventory visibility, and automation.

[Explore SAP Business Network Supply Chain Collaboration](#)

Carbon Footprint Management

Get visibility into the carbon footprint of your life sciences organization to support low-carbon operating models.

[Explore SAP Responsible Design and Production](#)

Spend Management

Supplier Lifecycle and Performance Management

Manage suppliers based on specific parameters by using a single, up-to-date supplier record with information maintained by suppliers.

[Explore SAP Ariba Supplier Lifecycle and Performance](#)

Procure to Pay

Drive visibility and control across spend-related processes and make sure your negotiated savings reach the bottom line.

[Explore SAP Ariba Buying and Invoicing](#)

Sourcing

Facilitate the creation and management of a robust sourcing pipeline to streamline supply chain management and drive down costs.

[Explore SAP Ariba Sourcing](#)

External Workforce and Services Management

Use a single platform to find, engage, and manage the external workforce of your life sciences organization.
