

SAP'S WHOLESALE DISTRIBUTION INDUSTRY SOLUTIONS

Wholesale distribution software from SAP and its partners

Supply Chain Planning

Fast, Flexible Planning

Create flexible supply network plans and match supply to demand while mitigating disruptions and evaluating strategies.

[Explore SAP Integrated Business Planning for Supply Chain](#)

Business Resilience

Prepare for unexpected events and manage shortage situations efficiently while improving service levels, lead times, and stock levels.

[Explore SAP S/4HANA for advanced ATP](#)

Transparency from Demand to Delivery

Plan across your supply network in real time and evaluate your parts inventory based on part volume, velocity, segment, and more.

[Explore SAP S/4HANA Supply Chain](#)

Collaboration Networks

Eliminate siloed, manual processes across your supply chain and work with partners on planning, inventory, and quality management.

[Explore SAP Business Network Supply Chain Collaboration](#)

Procurement

Procurement Visibility

Consolidate your data into a single system to centralize control of requisitioning, purchasing, sourcing, contracts, and analytics.

[Explore SAP Ariba Central Procurement](#)

Sustainable Savings

Manage spend more strategically and achieve new savings by discovering and selecting qualified suppliers from a broad supplier network.

[Explore SAP Ariba Sourcing](#)

Spend Visibility

Facilitate near real-time information-sharing and enhanced visibility into procurement processes to improve efficiency and reduce cost.
